WINEMAKER'S NOTES

Grapes are harvested at night in order to maintain fresh and bright acidity. The fruit goes straight to the press, where the juice sits for 24 hours. Then it is racked and separated from its gross lees and fermented clean at a low temperature in stainless steel tanks, ensuring multilayers of aromas and flavors.

2020 VINTAGE

This year undoubtedly presented challenges, principally due to the high summer temperatures and the low levels of precipitation during winter. These were the principal reasons for why harvest began several weeks earlier than normal. As always, the first variety to be harvested was the Sauvignon Blanc, and thanks to the early harvest, we could preserve its natural acidity.
